

PASTORAL / AG[®]

CYROLAB[™] LIQUID

BLOWFLY TREATMENT FOR SHEEP

ACTIVE CONSTITUENTS: 500 g/L CYROMAZINE

Flystrike protection for up to 14 weeks.

For when you need shorter-term protection of long wool sheep (up to 14 weeks) from strike by blowfly (*Lucilia cuprina*), including organophosphate resistant strains. Cyrolab Liquid can be applied either by hand jetting or by dipping. It is a water soluble suspension containing the active ingredient cyromazine, an insect growth regulator that breaks the lifecycle of the blowfly before they can damage the animal.

APPLICATOR

Hand Jetting Applicator or Dipping

WITHHOLDING PERIODS

MEAT: 7 days.

ESI: 21 days

MILK: DO NOT USE on sheep which are producing or may in the future produce milk that may be used or processed for human consumption.

WOOL: DO NOT USE less than 2 months before shearing or fibre collection.

STORAGE

KEEP OUT OF REACH OF CHILDREN. Store below 30°C (room temperature), in original containers, tightly closed. DO NOT store for prolonged periods in sunlight.

COMPARABLE PRODUCT

Vetrazin[®] Liquid Sheep Blowfly Treatment

DOSING & ADMINISTRATION

Critical Use Comments:

For use on sheep more than six weeks after shearing.

Reduced effectiveness is likely if used on sheep with lumpy wool.

Jet at onset of blowfly wave.

When used on sheep with less than 6 weeks wool a reduced period of protection may result.

Do not collect and re-use fluid which runs off.

Treatment	Initial Charge	Topping Up	Comments
Jetting	2 L per 1000 L	–	1. Jet at onset of Blowfly wave. 2. Apply 2 to 4 L of jetting fluid per sheep, depending on sheep size and wool length. 3. Ensure saturation to the skin. 4. Pay particular attention to treatment of the crutch, pizzles and polls.
Dipping (Plunge – Shower and constant replenishment)	2 L per 1000 L	2 L per 1000 L	1. Dip sheep on onset of fly wave. 2. Thoroughly saturate sheep. When using a shower dip, run top and bottom sprays independently so as to ensure maximum pressure and therefore penetration. 3. The product is a non-stripping dip so there is no need to reinforce during dipping.
Dressing	2 L per 1000 L	–	1. Clip the wool surrounding the strike, treat the struck area and the surrounding wool with a recommended Diazinon knock down product then thoroughly jet the sheep with PASTORAL AG Cyrolab Liquid. 2. The product is a slow killing larvicide and when used on its own, larvae may take 3 to 4 days to die.
