MOXILAB

ORAL DRENCH WITH SELENIUM FOR SHEEP

**ACTIVE CONSTITUENTS: 1 mg/mL MOXIDECTIN,
0.5 mg/mL SELENIUM (as sodium selenate)**

When you need a broad-spectrum oral drench with persistent activity when pastures are highly contaminated. Moxilab SE contains Moxidectin, the most potent of the macrocyclic lactones (MLs).

For the treatment and control of moxidectin-sensitive gastrointestinal parasites (including benzimidazole and/or levamisole resistant strains), lungworm and itchmite of sheep.

Moxilab SE can also be used as an aid in control of selenium responsive conditions. Selenium deficiency impairs the immune system and can reduce disease resistance, as well as cause ill thrift, infertility, scouring and white muscle disease.

Moxilab SE prevents reinfection with *Ostertagia* spp and barber's pole worm (*Haemonchus contortus*) for at least 14 days. It prevents pasture contamination by *Ostertagia* spp eggs for at least 35 days and barber's pole worm (*Haemonchus contortus*) eggs for at least 30 days. Persistent activity is important when there is significant pasture contamination, as it can delay the need for subsequent drenching. Preventing pasture contamination by eggs can also delay the need for subsequent drenching.

APPLICATOR

Pastoral Ag Variable Applicator - Oral Nozzle, 20ml Drench Gun

WITHHOLDING PERIODS

MEAT: 7 days

ESI: 7 days.

MILK: Do not use in lactating ewes where milk or milk products may be used or processed for human consumption.

STORAGE

Store below 30°C (room temperature) and protect from sunlight. Do not freeze.

COMPARABLE PRODUCT

Cydetin® Oral SE for Sheep

DOSING & ADMINISTRATION

Administer 1 mL per 5 kg live weight to give a dose of 0.2 mg moxidectin/kg and 0.1 mg selenium/kg using any standard drenching equipment.

DOSAGE GUIDE

Body Weight (kg)	Dose Volume	Doses Per Pack
10	2	10000
11-15	3	6666
16-20	4	5000
21-25	5	4000
26-30	6	3333
31-35	7	2857
36-40	8	2500
41-45	9	2222
46-50	10	2000
51-55	11	1818
56-60	12	1666
61-65	13	1538
66-70	14	1428
71-75	15	1333

For animals above 75 kg, dose at 1 mL per 5 kg body weight.

PASTORAL AG Moxilab Oral Drench has a wide margin of safety when used as recommended and is readily accepted by sheep.

PASTORAL AG Moxilab Oral Drench is safe to use concurrently with other treatments including fluke treatments and vaccines.
