

APPLICATORS & VACCINATORS

VARIABLE APPLICATOR 30ML

Durable plastic construction with ergonomic design. High chemical resistance Polyolefin cylinder with fast filling technology. Supplied with two different seal rings, red & blue. This applicator can be used to drench or as a pour-on, and is compatible with multiple Pastoral Ag animal health products. Comes with pour-on, drench and spray on nozzle. T Bar nozzle is also available.

PLASTIC VACCINATOR 1ML, 2ML, 2.5ML, 5ML

Features adjustable fixed dose settings, impact resistant polyolefin material construction with high chemical resistance and an easy off nozzle nut. The vaccinator has an ergonomic design with a finger grip hanging loop, with a metal needle mount for sturdy needle placement. Available in 4 sizes.

METAL SYRINGE 5ML

Adjustable fixed dose setting, full metal construction with ergonomic design. Sterilisable with high chemical resistance and impact resistant Polyolefin cylinder.

METAL DRENCHER 20ML

Features anti-rattle stream nozzle technology and an engineered high chemical resistant polyolefin cylinder. There are optional compounds available to suit different chemicals. Fast fill and variable fixed dose technology, the applicator also has an ergonomic comfort grip handle and lever. Can be converted to 20ml injector with conversion kit.
