

PASTORAL AG™

IVERLAB™

PLUS+

(IVERMECTIN PLUS CLORSULON)

BROAD-SPECTRUM ANTIPARASITIC INJECTION FOR CATTLE

Description

For the treatment and control of Ivermectin and Clorsulon sensitive internal and external parasites of beef and dairy cattle.

Target Parasites

Iverlab Plus is a ready to use broad-spectrum endectocide injection for cattle containing Ivermectin and Clorsulon for the treatment and control of Ivermectin and Clorsulon sensitive strains of internal and external parasites of cattle, including adult liver flukes.

Dosage & Administration

The recommended dose rate is 1mL/50kg live weight by subcutaneous injection. Heavier animals (for example mature bulls) should receive an additional 1 mL for each 50kg over 650kg.
